

ANANDHU KANNAN

Penetration Tester | Security Engineer | SOC Analyst

Kerala, India | +91 8547284144 | connect.anandhukannan@gmail.com | linkedin.com/in/anandhu-kannan | github.com/devwithanandhukannan | anandhu-kannan.in

PROFESSIONAL SUMMARY

Security engineer with hands-on penetration testing experience across binary reverse engineering, network, and web application testing. Skilled with Ghidra, Burp Suite, Metasploit, Nmap, and Wireshark, with real-world incident monitoring using IBM QRadar. Authors remediation-focused reports aligned to OWASP Top 10 and MITRE ATT&CK. CEH-certified, with a full-stack development background (.NET, Node.js, React, Django) that supports secure-by-design assessments of the applications being tested.

CORE SKILLS

Offensive Security: Penetration Testing, Vulnerability Assessment, Binary Reverse Engineering, Network & Web App Testing

Security Tools: Ghidra, Burp Suite, Nmap, Metasploit, Wireshark, OWASP ZAP, IBM QRadar

Frameworks & Standards: OWASP Top 10, MITRE ATT&CK

Monitoring & Response: SIEM / IBM QRadar, Incident Response, Technical Reporting & Remediation Roadmaps

Supporting Development Skills: Java, Python, C#, JavaScript/TypeScript, Node.js, React.js, ASP.NET Core, Docker, REST APIs, Git

PROFESSIONAL EXPERIENCE

Security Engineering Intern *HackerSchool — Bangalore*

May 2025 – Nov 2025

- Performed 15+ vulnerability assessments using Ghidra for binary reverse engineering alongside Nmap, Burp Suite, and Metasploit for network and web application penetration testing.
- Monitored security events with IBM QRadar for real-time intrusion detection and incident response.
- Authored technical incident reports with remediation roadmaps aligned to OWASP Top 10 and MITRE ATT&CK frameworks.

Freelance Software Developer *Self-Employed — Remote*

Jan 2022 – Present

- Delivered 10+ production applications across healthcare, e-commerce, and education, applying secure coding practices across the SDLC — requirements through deployment and post-launch support.
- Built .NET Clean Architecture and Node.js microservices with Redis-backed session management, reducing attack surface through layered architecture.

Full Stack Application Developer Intern *ApplyGoat — Remote (Germany)*

2024 – 2025

- Contributed to deployment pipelines and version management for a production platform serving 1,000+ active users, improving release reliability.

Technical Mentor — Application Development *FISAT, Angamaly*

2024 – 2025

- Mentored 70+ students on MERN stack, REST APIs, microservices, and deployment strategies.

SECURITY PROJECTS

Security Testing & Vulnerability Assessment Lab — *Ghidra, Burp Suite, OWASP ZAP, Nmap, Wireshark, Metasploit, IBM QRadar*

- Reverse-engineered binaries with Ghidra and conducted full-scope penetration tests on authorized environments, documenting injection, authentication, and configuration vulnerabilities.
- Produced OWASP Top 10-aligned remediation reports for each assessment.

.NET Clean Architecture Microservices Platform — *ASP.NET Core, Redis, Docker, REST APIs, SQL Server*

- Architected a multi-service backend using Clean Architecture layers with Redis caching and pub/sub messaging; containerized all services with Docker, reducing DB load 60% under load testing.

AI Oral Cancer Detection & Biopsy Guidance System (Patent Filed) — *Python, PyTorch, Flask, React.js, OpenCV, Raspberry Pi*

- Designed a Swin-UNet segmentation model deployed on Raspberry Pi for low-cost rural screening, currently in clinical validation with Annoor Dental College.

EDUCATION

Master of Computer Applications (MCA), Computer Science — FISAT, Angamaly, Kerala (2023 – 2025)

Bachelor of Computer Applications (BCA) — NSS College, Rajakumari, Kerala (2020 – 2023)

PG Diploma, Blockchain Technology — IIITM-K / Digital University Kerala (2025)

CERTIFICATIONS

- Certified Ethical Hacker (CEH v13) — EC-Council
- MITRE ATT&CK v13 Foundations — AttackIQ Academy

ACHIEVEMENTS

- Patent filed: AI & IoT Based Oral Pre-Cancer Biopsy Guidance and Detection System
- 1st Prize, Scientia 2K25 — technical paper on AI-Driven Drug Discovery
- 1st Prize (BCA) / 2nd Prize (MCA) — capstone project awards for full SDLC execution
- Core developer, ApplyGoat browser extension — shipped to 1,000+ active users
