PROFESSIONAL SUMMARY

Network-focused IT Professional with hands-on experience in network security assessment, monitoring, and infrastructure analysis. Proficient in network scanning, vulnerability assessment, and SIEM event monitoring with expertise in TCP/IP protocols, network architecture, and security tools. Demonstrated ability in network troubleshooting, system enumeration, and security event correlation through practical lab environments and real-world internship experience. Strong foundation in Linux systems, scripting, and cloud infrastructure deployment.

CERTIFICATIONS

Certified Ethical Hacker (CEH v13)	EC-Council, 2026
MITRE ATT&CK v13 Foundations	AttackIQ Academy, 2026

TECHNICAL SKILLS

Networking: TCP/IP, DNS, DHCP, VPN, Subnetting, Network Scanning (Nmap), Network Architecture
Network Security: Vulnerability Assessment (Nessus, OpenVAS), Security Monitoring, Firewall Configuration
SIEM & Monitoring: IBM QRadar, Security Event Analysis, Log Correlation, Incident Triage
Operating Systems: Linux (Ubuntu, Kali), Windows Server, System Administration
Scripting & Programming: Python, Bash Scripting, SQL, JavaScript
Cloud & Infrastructure: AWS (EC2, S3), Server Deployment, Cloud Networking
Tools: Wireshark, Burp Suite, Metasploit, Hydra, Postman, Git
Database: MySQL, MongoDB

PROFESSIONAL EXPERIENCE

Network Security Intern — Hacker School, Kerala, India — Jun 2024 – Dec 2024

- Performed comprehensive network scanning and enumeration using Nmap to identify active hosts, open ports, services, and OS fingerprinting across multiple network segments
- Conducted network vulnerability assessments using Nessus and OpenVAS, identifying misconfigurations, outdated services, and security weaknesses in network infrastructure
- Monitored and analyzed network security events using IBM QRadar SIEM, correlating logs from firewalls, IDS/IPS, and network devices to detect anomalies and potential threats
- Executed network penetration testing exercises to identify exploitable services, weak authentication mechanisms, and insecure network configurations
- Analyzed network traffic patterns and protocol behaviors to understand attack vectors and communication flows
- Documented findings in detailed technical reports with network diagrams, risk assessments, and remediation recommendations

Full-Stack Developer — Self-Employed, Kerala, India — 2020 – Present

- Designed and deployed scalable web applications on AWS infrastructure (EC2, S3), implementing secure network configurations and access controls
- Configured and managed Linux servers, handling SSH access, firewall rules (iptables), and network service deployment
- Implemented RESTful APIs with proper network security practices including TLS/SSL configuration and secure data transmission
- Managed database servers (MySQL, MongoDB) with network-level security configurations and access restrictions
- Core developer of ApplyGoat browser extension with 1,000+ active users, handling client-server communication and API integration

- Troubleshoot network connectivity issues, DNS configurations, and server-client communication problems

TECHNICAL PROJECTS

Network Security Assessment Lab — GitHub

Built comprehensive home lab environment for network security testing. Performed systematic network enumeration, service identification, and vulnerability mapping on Linux systems. Documented complete network topology, attack paths, and security gaps with detailed remediation strategies.

Virtual Network Infrastructure Testing — GitHub

Designed and configured virtual network environments for security testing. Conducted network-level vulnerability assessments, service exploitation, and network traffic analysis. Implemented various network security scenarios including segmentation bypass and lateral movement techniques.

TECHNICAL WRITING & RESEARCH

Network Security Blog — Medium

Publish technical articles on network security concepts, protocol analysis, network scanning methodologies, and security monitoring techniques. Share practical insights on network troubleshooting, infrastructure security, and emerging network technologies.

EDUCATION

Master of Computer Applications (MCA) — FISAT, Angamaly, Kerala — 2023 – 2025

Bachelor of Computer Applications (BCA) — NSS College, Rajakumari, Kerala — 2020 – 2023

PG Diploma in Blockchain Technology — IIITM-K, Trivandrum — 2025 (In Progress)

ACHIEVEMENTS

- Patent Filed: AI-driven oral cancer detection system (MoU with Annoor Dental College)
- Won 1st Prize (BCA) and 2nd Prize (MCA) for capstone projects
- 1st Prize — Scientia 2K25: Technical paper on AI-Driven Drug Discovery
- Successfully deployed and maintained production applications serving 1,000+ active users

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native)

Continuous Learning: Active hands-on practice with network security tools, lab environments, and infrastructure projects

Community: Regular contributor on GitHub and Medium with focus on network security and infrastructure topics
