Professional Summary

Web Developer with hands-on experience in building scalable web applications and RESTful APIs. Proficient in React, Node.js, Django, and MongoDB, with a solid understanding of frontend-backend integration and modern web development practices. Experienced in deploying applications using AWS and Docker, with a strong focus on writing clean, maintainable code. Quick learner with a problem-solving mindset, eager to contribute to high-quality development teams.

Technical Skills

Programming Languages: Java, Python, JavaScript, TypeScript, C++

Web Technologies: Node.js, Express.js, React.js, Django, REST APIs, Socket.io, HTML5, CSS3, Tailwind CSS, Bootstrap, Web3 (Hoodi, Hardhat, Solidity, MetaMask)

Databases & Data: MySQL, MongoDB, SQL Queries, Data Modeling, Database Design

DevOps & Tools: Git, GitHub, Docker, Postman, Vercel, Linux Administration

Security & Monitoring: IBM QRadar, Burp Suite, Nmap, Metasploit, OWASP Top 10, MITRE ATT&CK

Methodologies: Agile, Scrum, SDLC, Waterfall, Test-Driven Development, Code Review

Professional Experience

Full Stack Application Developer Intern

2024 – 2025

ApplyGoat — Remote (Germany)

- Built and scaled a job automation platform using Bubble (no-code) along with custom integrations using Node.js, React.js, and MongoDB.
- Developed and deployed a browser extension from MVP to production, supporting 1,000+ active users with continuous improvements and maintenance.
- Contributed to deployment and version management practices, improving system reliability and iteration speed.

Freelance Application Developer

Jan 2022 – Present

Self-Employed — Remote

- Delivered 10+ production-grade applications across healthcare, e-commerce, and education domains using Java, Python, Node.js, and Django.
- Managed complete SDLC independently — requirements gathering, system architecture, development, testing, debugging, deployment, and support.

Security Engineering Intern

May 2025 – Nov 2025

HackerSchool — Bangalore

- Performed 15+ vulnerability assessments on web applications using industry-standard tools including Nmap, Burp Suite, and Metasploit.
- Monitored security events using IBM QRadar for real-time intrusion detection and incident response.
- Authored technical incident reports with remediation roadmaps aligned to OWASP Top 10 and MITRE ATT&CK frameworks.

Data Science Intern

Apr 2024 – May 2024

SMEC Automation Pvt Ltd

- Developed predictive machine learning models using Python, Scikit-learn, and Pandas.
- Performed data preprocessing including cleaning, feature selection, and basic data augmentation.
- Split datasets into training and testing sets, trained models, and evaluated performance using accuracy and other metrics.
- Applied and compared multiple algorithms to improve model performance and reliability.

Technical Mentor — Application Development

2024 – 2025

FISAT, Angamaly

- Mentored 70+ students and conducted workshops on MERN stack, REST APIs, SDLC concepts, and deployment strategies.

Projects

AI Oral Cancer Detection & Biopsy Guidance System (Patent Filed)

GitHub

Python, PyTorch, Flask, React.js, Node.js, OpenCV, Raspberry Pi

- Designed and developed a Swin-UNet-based segmentation model for oral cancer detection.
- Deployed the AI solution on Raspberry Pi for portable, low-cost screening in rural healthcare settings.

- Currently undergoing real-world testing and validation in collaboration with a dental college.

AI Mock Interview Platform

GitHub

Django, React.js, MongoDB, REST APIs

- Built scalable interview platform with HR, technical, and aptitude modules using microservices architecture.

Hangout — Real-Time Social Media Platform

GitHub

Node.js, Express.js, React.js, MongoDB, Socket.io, REST APIs

- Developed full-stack social platform with real-time chat, video calls, and notification systems.
- Engineered WebSocket layer with Socket.io for persistent messaging and offline notification queuing.
- Designed and implemented RESTful APIs for user management, posts, and interaction features.

Car Rental System with AI Damage Detection

GitHub

Python, Django, MySQL, REST APIs, Hugging Face Models

- Developed enterprise rental platform with booking system, driver assignment, and inventory management using Python and Django.

Security Testing & Vulnerability Assessment Lab

GitHub Wiki

Burp Suite, OWASP ZAP, Nmap, Wireshark, Metasploit, IBM QRadar

- Conducted penetration testing on authorized environments; documented injection, authentication, and configuration vulnerabilities.
- Produced comprehensive remediation reports aligned with OWASP Top 10 security standards.

Education

Master of Computer Applications (MCA) — FISAT, Angamaly, Kerala

2023 – 2025

Bachelor of Computer Applications (BCA) — NSS College, Rajakumari, Kerala

2020 – 2023

PG Diploma in Blockchain Technology — IIITM-K, Trivandrum

2025 (In Progress)

Certifications

Certified Ethical Hacker (CEH v13) — EC-Council

MITRE ATT&CK v13 Foundations — AttackIQ Academy

Achievements

- **Patent Filed:** AI-driven oral cancer detection system; MoU established between FISAT and Annoor Dental College.
- **Best Project Awards:** 1st Prize (BCA) and 2nd Prize (MCA) for innovative capstone projects demonstrating full SDLC execution.
- **1st Prize — Scientia 2K25:** Technical paper presentation on AI-Driven Drug Discovery.
- **Product Shipped:** Core developer of ApplyGoat browser extension with 1,000+ active users in production.
