PROFESSIONAL SUMMARY

Junior Cybersecurity Professional and Certified Ethical Hacker (CEH v13) with six months of hands-on internship experience in vulnerability assessment, penetration testing, and SIEM monitoring. Proficient in industry-standard tools (Metasploit, Burp Suite, Nmap, Nessus, IBM QRadar) and well-versed in OWASP Top 10 and MITRE ATT&CK frameworks. Demonstrated ability to discover, exploit, and document security weaknesses through Hack The Box machines, custom labs, and technical research.

CERTIFICATIONS

Certified Ethical Hacker (CEH v13)	EC-Council, 2026
MITRE ATT&CK v13 Foundations	AttackIQ Academy, 2026

TECHNICAL SKILLS

Security Tools: Burp Suite, Metasploit, Nmap, Nessus, OpenVAS, Hydra

Security Frameworks: OWASP Top 10, MITRE ATT&CK

Programming & Scripting: Python, JavaScript, SQL, ARM v7 Assembly

Web & Cloud: MERN Stack, Django, REST APIs, AWS (EC2, S3), Postman

Monitoring & SIEM: IBM QRadar, Security Event Analysis

Other: Git, Linux, Agile

PROFESSIONAL EXPERIENCE

Cybersecurity Intern — Hacker School, Kerala, India — Jun 2024 – Dec 2024

- Conducted vulnerability assessments and web application scanning using Nessus, OpenVAS, and Burp Suite, identifying misconfigurations and security weaknesses
- Executed penetration tests on vulnerable systems utilizing Metasploit, Nmap, Hydra, and manual exploitation techniques
- Monitored and triaged security events daily using IBM QRadar SIEM, contributing to improved threat detection
- Mapped attack techniques to MITRE ATT&CK framework and OWASP Top 10 during assessments and simulations
- Produced professional security reports detailing findings, exploitation steps, risk ratings, and remediation recommendations

Freelance Web Developer — Self-Employed, Kerala, India — 2020 – Present

- Developed and maintained secure full-stack applications using MERN Stack and Django, implementing secure coding practices and input validation
- Performed testing and code reviews on production applications to identify and remediate flaws before deployment
- Deployed and managed applications on AWS (EC2, S3)
- Core developer of ApplyGoat browser extension, currently serving 1,000+ active users
- Managed MongoDB and MySQL databases with focus on injection prevention and data security

SECURITY PROJECTS

Hack The Box Challenges — GitHub

Successfully compromised a medium-difficulty Linux machine through systematic enumeration, vulnerability exploitation, and privilege escalation. Delivered a professional-grade penetration testing report with clear attack narrative and remediation guidance.

Vulnerable Virtual Machine Assessments — GitHub

Conducted authorized penetration testing on multiple intentionally vulnerable virtual machines. Exploited various vulnerabilities using Metasploit, custom scripts, and manual techniques. Documented complete attack chains and provided remediation strategies.

TECHNICAL WRITING & RESEARCH

Security Research Blog — Medium

Regularly publish technical write-ups on penetration testing methodologies, vulnerability analysis, tool usage, and proof-of-concept exploits. Actively contribute to the cybersecurity community through detailed research and knowledge sharing.

EDUCATION

Master of Computer Applications (MCA) — FISAT, Angamaly, Kerala — 2023 – 2025

Bachelor of Computer Applications (BCA) — NSS College, Rajakumari, Kerala — 2020 – 2023

PG Diploma in Blockchain Technology — IIITM-K, Trivandrum — 2026 (In Progress)

ACHIEVEMENTS

- Patent Filed: AI-driven oral cancer detection system (MoU with Annoor Dental College)
- Won 1st Prize (BCA) and 2nd Prize (MCA) for capstone projects
- 1st Prize — Scientia 2K25: Technical paper on AI-Driven Drug Discovery
- Successfully shipped ApplyGoat browser extension (1,000+ active users)

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native)

Continuous Learning: Active participant on Hack The Box, CTF competitions, and security research

Community: Regular contributor on GitHub and Medium
